1. Royal Cyber SAP Hybris Commerce Integration Experience
Royal Cyber has immense experience in integrating enterprise and 3rd party systems with SAP Hybris. The below are some of our implementation details:

1. Royal Cyber developed, installed and configured a custom extension to the standard SAP Hybris Commerce Accelerator to integrate BazaarVoice services for product ratings and reviews.

2. Royal Cyber developed, installed and configured a custom extension to the standard SAP Hybris Commerce to provide the **account integration from the SAP Hybris Commerce instance to Salesforce via Dell Boomi**; SAP Hybris Commerce to call web services when an account is created, updated. Interceptors/AftersaveListeners were used to listen for account data.

3. Royal Cyber developed, installed and configured a custom extension to SAP Hybris Commerce to generate an XML file in a specified format to send the order cancelation request details to Syteline. Order cancel request was based on standard SAP Hybris Commerce data structures; no customization of data model was included. This was the data flow from SAP Hybris Commerce after the customer/CSR has canceled the order in full or partial in the storefront.

4. Royal Cyber developed, installed and configured a custom extension to the standard SAP Hybris Commerce **CPQ integration** as follows:
   
   - Modified the configure button on the PDP so that it calls out to the ConfigAir System passing all of the required attributes.
   - Installed the ConfigAir provided extension.
   - Modified the CPQ extension and provided processing to account for the additional information that is passed back to SAP Hybris including, but not limited to, smart part number and bill of material (BOM) data.
   - Extended the out-of-the-box order item entry model to include the additional product level attributes provided by ConfigAir including, but not limited to, smart part number and bill of material (BOM) data.
5. We moved products from PIM to SAP Hybris commerce accelerator hosted on different Hybris suit using data hub and y2y sync.

6. Royal Cyber did customization of Apache Nutch for the purpose of indexing CMS content pages.

7. Royal Cyber has experience of integrating SAP Hybris Commerce with Sitecore using Sitecore commerce connect.

8. We have expertise in Taxonomy structure that is needed for storefront such as delivery from EIS into PCM. We have experience of mapping the Product model to taxonomy structure, Customize the product and taxonomy data model and/or load of product data into SAP Hybris PCM. We have developed PDP page to the point that it can be used to verify product data is appropriately replicating.

9. Royal Cyber has also implemented SAP Hybris Commerce with Amazon S3, Avalara, PayPal.

10. Moreover, we can leverage ImpEx engine to create, update, remove and export.

2. Royal Cyber Implemented Architectures for Clients

1. Dell Boomi Integration Architecture

2. Royal Cyber Technical White Paper
2. **PIM** - eCommerce Product Integration Architectures

- Design Hybris DB (PCM)
- Develop PIM > Hybris DB mapping and V2Y sync
- Ultimately, make the Hybris DB - WCMS ready

3. **Royal Cyber Proposed Hybris Implementation Architecture**

- Design PIM architecture
- Future looking PIM hierarchy - supporting all future deployments
- Support with data needs for display taxonomy
3. Royal Cyber SAP Hybris Service Offerings

1. Green Field Implementation
   - Roll out of the Hybris eCommerce Store in the optimal time Period from Hybris Certified Resource
   - Help in End to End Implementation starting from Initiation to Roll out as per Agile Delivery Framework

2. Hybris Version Upgrade
   - Hybris Commerce Version Upgrade Starting from 4.X to 6.X from Hybris Certified Consultant
   - Free Assessment Report of the existing Deployment and Optimization

3. Support & Enhancement
   - End to End Support from Both Infra and Apps.
   - 24X7 Support with well-defined Industry SLA
   - Customized Support Package (Gold, Silver, Platinum) as per the need

4. Hybris Platform Migration
   - Hybris Commerce Platform Migration from On Premise to On Cloud from Certified AWS Consultants.
Royal Cyber Technical White Paper

- Provide Better ROI with Options to get the Discounted Support and Enhancement Packages

5. **Hybris Performance Tuning**
   - Hybris Store Performance Tuning
   - (App, DB, Solr Infra)
   - RC Qualified Performance Experts can help in resolving and providing Performance Challenges

6. **Regional & Global Hybris Rollout**
   - SAP Hybris Commerce Certified Consultants help in Parallel Global and Regional Roll Outs
   - Can work with the existing implementation Team for the Business Critical Rollout as per the agreed SLA and timeline
