

Innovate Faster, Reduce Costs, and Operate More Securely with Cloud Computing from Amazon Web Services

The Time to Migrate to The Cloud is Now

Whether your goal is to expand your organization’s website capabilities, develop and deploy custom applications quickly and efficiently, or build a more scalable, responsive database infrastructure, the AWS Cloud provides an extensive set of cloud services that can help you drive your business forward. AWS has the tools, templates, and resources to help you get started on your journey to the cloud today.

Migration Support for Amazon Web Services

Our experts will gather your existing infrastructure knowledge, analyze the services offered by a current service provider, compare cost analysis VS total cost of ownership on Amazon Web Services. Our services are billed only for hours utilized during the migration related activities. To handle day to day challenges, your data security is our number 1 priority. We set up real-time alerts that best fits your business requirements right after the deployment is complete.

Whether you have a Data Center on-premises or hosted on other cloud providers, Royal Cyber offers flexibility & ease of migration to Amazon Web Services. Your team shall witness Royal Cyber’s expertise in migrating business workloads to Amazon without hassle. We conduct in-house migration sessions to help your team in managing operations on AWS after successful migration.

Where Royal Cyber Adds Value

Our migration services are designed to support end to end infrastructure and application migration to Amazon Web Services platform. We offer 24/7 support and understand that your time is valuable, better spent on spreading business rather than spending hours in migrating your workloads to the cloud. We offer lowest operating cost, ensure business continuity, maintain 0% downtime during deployments and keep optimizing your IT performance.

Why Should You Migrate to the AWS Cloud with Royal Cyber Inc. Today?

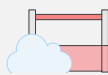

IMPROVE PERFORMANCE

Provision the compute, storage, and memory you need to support dynamic business workloads without hardware refreshes.

AUTOMATE SCALING

Set conditions that can automatically scale your capacity up and down to maintain availability for optimal resource utilization.

USE THE SAME TOOLS AS ON-PREMISES

Leverage existing virtual machine images and management software’s like Microsoft System Center and VMWare vCenter.

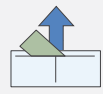

GAIN GLOBAL AVAILABILITY

Access reliable, high-performance global IT infrastructure with a few clicks.

SECURE YOUR DATA

Protect data with 256-bit encryption, virtual isolation, identity and access controls, and much more.

CAPITALIZE ON PAY AS YOU GO PRICING

Trade CapEx for OpEx and stop paying for resources that you don’t need.
